

Mira VPN

Client Specification

v1.0 — Production Reference — June 2026

Vualet · Dubai, UAE · Confidential

1. Server & API

1.1 WireGuard Endpoint

Field	Value
Server Address	178.104.251.30
Protocol	WireGuard (Curve25519 + ChaCha20-Poly1305)
UDP Port	51820
Server Public Key	ByK5yGC96gYi0GZ/dIoyVBWZkLrCGyQH+XKtxS1UJhE=
Client Subnet	10.66.66.0/24 (clients assigned .2–.254)
DNS	1.1.1.1, 1.0.0.1
MTU	1420
Keepalive	25 seconds

1.2 Registration API

Field	Value
Method	POST
URL	http://178.104.251.30/v1/tunnel/issue
Content-Type	application/json

Request body:

```
{
  "public_key": "<client WireGuard pubkey, base64, 44 chars>",
  "tier": "free"
}
```

Response 200:

```
{
  "ip": "10.66.66.2",
  "server_endpoint": "178.104.251.30:51820",
  "server_public_key": "ByK5yGC96gYi0GZ/dIoyVBWZkLrCGyQH+XKtxS1UJhE=",
  "config": "[Interface]\nPrivateKey = FILL_ME\nAddress = 10.66.66.2/32\nDNS = 1.1.1.1, 1.0.0.1\nMTU = 1420\n\n[Peer]\n"
```

Response 400: {"error": "public_key required"}

2. Platform TUN Specs

2.1 Windows

- Ship `wireguard-installer.exe` as embedded resource
- Extract to `%LOCALAPPDATA%\Mira VPN\WireGuard\`
- Silent install: `msiexec /i wireguard.msi /quiet /norestart DO_NOT_LAUNCH=1`
- Drive tunnel via `wireguard.exe /installtunnelservice / /activate`
- No user prompts beyond mandatory Windows UAC

2.2 Android

- Extend `VpnService`
- `Builder.addRoute("0.0.0.0", 0) + .addDisallowedApplication(packageName)`
- `foregroundServiceType="specialUse"` with `PROPERTY_SPECIAL_USE_FGS_SUBTYPE="vpn"`
- No `maxSdkVersion` cap on `FOREGROUND_SERVICE_SPECIAL_USE`
- WireGuard-Go or Xray Reality (see [mmasoomi-glitch/uncle-z-calc](#))

2.3 iOS / macOS

- `NEPacketTunnelProvider` + `WireGuardKit` (Swift Package)
- App Group: `group.com.vualet.mira`
- Bundle ID: `com.vualet.mira.PacketTunnel`
- `ITSAppUsesNonExemptEncryption = false` (standard crypto only)
- `PrivacyInfo.xcprivacy` required (UserDefaults CA92.1, FileTimestamp C617.1)

2.4 Linux

- `wg genkey / wg pubkey` → POST to API → `wg-quick up mira`
- API config output is already wg-quick compatible

3. Payment — NowPayments

Field	Value
API Key	J5SAFWA-8174JB1-HNKYGFG-HT5F869
IPN Secret	Set in NowPayments dashboard
Invoice Endpoint	POST https://api.nowpayments.io/v1/invoice
IPN Callback	POST /api/webhooks/nowpayments (HMAC-SHA512 verified)
Price	\$9.99 USD / month
Accepted	200+ coins (USDT-TRC20, BTC, ETH, XMR) + card (Visa/MC)

Checkout flow: Client POSTs {email,plan} to /api/vpn/checkout/crypto → receives {redirectUrl} → redirects to NowPayments hosted page → user pays → IPN fires → backend mints permit → permit emailed to user.

4. Brand — Design System

4.1 Colors

Token	Hex	Role
mira-rose	#F8A5A0	Primary
mira-rose-deep	#E68A85	Hover/active
mira-petal	#FFDCE0	Soft bg
mira-lavender	#C7B8F0	Calm accent
mira-lavender-deep	#A595E8	Focus
aether	#6366F1	AI core
mira-cream	#FFF8F0	Light bg
mira-canvas	#FEFAF6	Card surface
mira-onyx	#1A1525	Dark bg
mira-ink	#2A1F2D	Primary text
mira-graphite	#524A55	Secondary text
mira-slate	#8C8190	Muted
mira-fog	#E8E0EA	Borders

4.2 Gradient

```
background: linear-gradient(135deg, #F8A5A0 0%, #C7B8F0 55%, #6366F1 100%);
```

4.3 Typography

Role	Font	Weight
Display / Headings	Fraunces (serif)	300–400
UI / Body	Inter (sans-serif)	400–600
Code	JetBrains Mono / Consolas	400

4.4 Radii & Shadows

Token	Value
-------	-------

radius-sm	10px
radius-md	16px
radius-lg	24px
radius-full (pills)	999px
shadow-sm	0 1px 3px rgba(248,165,160,0.12)
shadow-md	0 4px 16px rgba(199,184,240,0.18)
shadow-lg	0 16px 48px rgba(199,184,240,0.25)

4.5 Buttons

Primary (`.btn-mira`): gradient pill, white text, pill shape.

Secondary (`.btn-mira-soft`): transparent bg, 2px solid rose border, ink text.

5. Logo Assets

File	URL
Primary mark (color)	/mira/mira-logo-color.svg
White variant	/mira/mira-logo-white.svg
Mono (currentColor)	/mira/mira-logo-mono.svg
Wordmark (mark + MIRA)	/mira/mira-wordmark-color.svg
Wordmark white	/mira/mira-wordmark-white.svg
Raster 512px	/mira/mira-logo-color-512.png
Raster 256px	/mira/mira-logo-color-256.png

All SVGs are scalable, transparent backgrounds. All assets live on the deployed server and in the GitHub repo at `public/mira/`.

6. Product Tiers

	Free	Paid
Price	\$0 forever	\$9.99 / month
Speed	500 kbps	5 Mbps
Session	2 hours, then reconnect	unlimited
Volume	unlimited (speed-capped)	50 GB / month
Devices	1	3
Ads	yes	no
Server	nearest only	smart routing
Banking Pause	yes	yes

7. Key Gotchas

1. **Traffic loop on Android:** `Builder.addDisallowedApplication(packageName)` is mandatory. Without it, VPN app outbound traffic loops through its own tunnel and no packets reach the server. Tested + confirmed.
2. **Foreground Service on Android 14+:** `specialUse not vpn`. No `maxSdkVersion` cap.
3. **WireGuard key format:** 44-char base64, not base64url. No `-` or `_`.
4. **iOS Privacy Manifest:** `PrivacyInfo.xcprivacy` mandatory since iOS 17. App Store rejects without it.
5. **iOS encryption declaration:** `ITSApUsesNonExemptEncryption = false`. WireGuard only uses standard Curve25519 + ChaCha20.
6. **Windows UAC:** unavoidable for any kernel TUN driver. NordVPN and Psiphon have the exact same popup.
7. **NowPayments IPN signature:** HMAC-SHA512 over raw JSON body, verified constant-time. Header: `x-nowpayments-sig`.
8. **Rate limiting:** `/tunnel/issue` has no rate limit yet. Add via nginx `limit_req_zone` at scale.

8. Reference Repos

What	Repo	Branch
Web frontend (Next.js)	<code>mmasoomi-glitch/vualet-web</code>	<code>feature/mira-vpn-storefront</code>
Android (VLESS+Reality, tested)	<code>mmasoomi-glitch/uncle-z-calc</code>	<code>main</code>
Windows (WPF tray + PS1)	<code>mmasoomi-glitch/vualet-web</code>	<code>windows/MiraVpn/</code>

9. Live URLs

Page	Status	URL
